Human: A young girl asleep on the sofa cuddling a stuffed bear.

Model sample 1: A close up of a child holding a stuffed animal.

Model sample 2: A baby is asleep next to a teddy bear.

Estimate solar savings potential

Analysis complete. Your roof has:

1,531 hours of usable sunlight per year

Based on day-to-day analysis of weather patterns

758 sq feet available for solar panels

Based on 3D modeling of your roof and nearby trees

\$5,000 savings

Estimated net savings for your roof with a 20-year lease

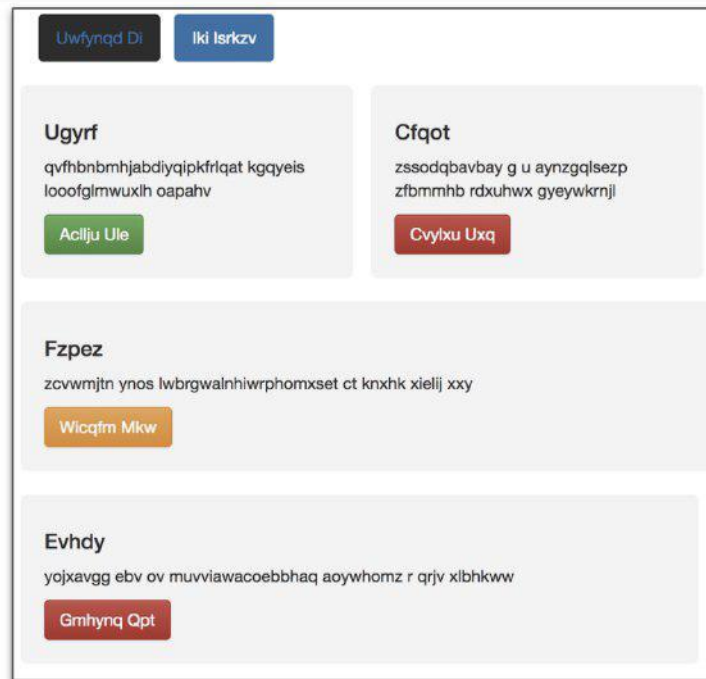

[FINE-TUNE ESTIMATE](#)

Generate New Game Levels

Figure 6: Level with increasing difficulty. Our LVE approach can create levels composed of multiple parts that gradually increase in difficulty (less ground tiles, more enemies). In the future this approach could be used to create a level in real-time that is tailored to the particular skill of the player (dynamic difficulty adaptation).
